

SolarWorld is expanding US manufacturing capacity from 250 MW to 500 MW

Average electricity rates continue to rise between 4 to 7% annually.

Without a PV system, your electricity costs could double every 10 years.

Let the sun pay your electric bill!

## Put more money in your pocket

- Reduce your electric bill
- Increase the resale value of your home
- Protect yourself from utility rate hikes
- Protect the environment by using solar energy

## Sunmodule®

- Industry-leading performance
- Designed to last more than 30 years
- Independently tested to generate more energy per rated kW than other major brands
- More kWh for your money
- Module power is guaranteed for 25 years by the largest solar products manufacturer in America since 1977

**SolarWorld. And EveryDay is a SunDay.**

Solar power is a clean, reliable and cost effective energy solution

When sunlight falls on solar panels, it generates electricity. There are no moving parts to maintain or wear out so they will work for decades.

The inverter makes the solar electricity suitable for use in your home or on the grid. You don't need to change your wiring or appliances.

Your meter keeps track of how much power you use and how much your Sunkit returns to the grid. Your utility company then bills you only for the net amount.

## SolarWorld Sunmodules can help you...

### Save money now

- Get a federal income tax credit for 30% of the installed cost of a new PV system.
- Get state and local rebates where applicable. (see [www.DSIREusa.org](http://www.DSIREusa.org))

### Save money for years to come

- Boost the resale value of your home by up to 20 times the annual energy savings from your solar PV system.
- Protect yourself from inevitable utility rate hikes.

### Help the environment

- Avoid the pollution and greenhouse gas emissions that come with fossil fuel generated electricity.
- SolarWorld recycles Sunmodules at their end of life to make new products.

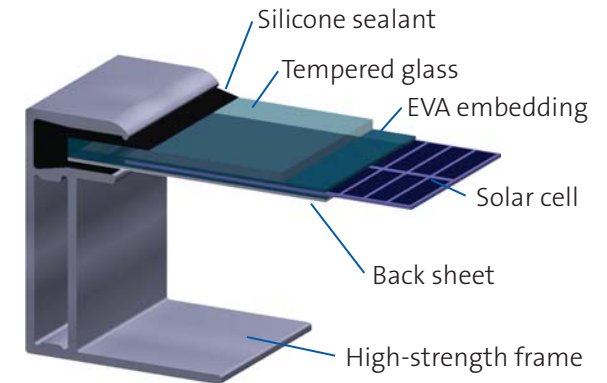

### Secure your investment

- Sunmodule power is warranted for 25 years.
- SolarWorld is the largest manufacturer of solar photovoltaic panels in the USA since 1977 and is a \$1 billion world wide solar manufacturer.
- SolarWorld makes the Sunmodule in the USA, promoting local economies and energy independence.

## SolarWorld Sunmodules

the tried and true workhorse of the solar industry

- Multi-year independent testing by Photon magazine confirms that Sunmodules generate up to 10% more kWh per rated kW than other major brands. — More kWh means more money in your pocket.
- The Sunmodule's tight +/- 3% power tolerance ensures that you get the output you're paying for.

- Sunmodules meet or exceed the latest electrical codes for safety and durability.
- Sunmodules are manufactured in ISO 9001:2000 certified factories.
- Sunmodules are tested to withstand, hail, extreme heat, high winds and heavy snow loads.
